Geological boundary	
exposed	
Fault or shear	
exposed	
concealed	
concealed, interpreted from aeromagnetic data	-??-
Fold, showing axial trace	
anticline, concealed	
Small-scale fold axis, showing trend and plunge	·
unspecified	——> 31
S-vergence	$-\omega \Rightarrow 30$
Bedding, showing strike and dip	
inclined	
overturned	-60
way-up not known, inclined	68
Trend of bedding or foliation	
Igneous layering	
trend of igneous layering	
Way-up indicator	
graded bedding	→ 84
Foliation, unspecified, showing strike and dip	
inclined	68
Metamorphic foliation, showing strike and dip	
inclined	85
vertical	
Gneissic banding, showing strike and dip	
inclined	<u> 13</u>
Cleavage, showing strike and dip	
inclined	_80_
Lineation, unspecified, showing trend and plunge	
inclined	→ 43
Stretching lineation, showing trend and plunge	
inclined	 ◆ 48
Fracture, joint, or extension vein, showing strike and dip	
inclined	65
Airphoto lineament	
unspecified	
Aeromagnetic lineament
