Geological boundary	
exposed	
Fault or shear	
exposed	
concealed	
Fold, showing axial trace	
anticline; concealed	
syncline; exposed, concealed	<del></del>
synform; exposed, concealed	<del></del> +-
Small-scale fold axial surface, showing strike and dip	90
inclined	<del></del>
vertical	<del></del>
Small-scale fold axis, showing trend and plunge	
inclined	→ 80
synform	€ 30
Z-vergence	$-N \rightarrow 45$
Bedding, showing strike and dip	
inclined	80
Igneous layering, showing strike and dip	
inclined	_ <u>^</u> 65
Metamorphic foliation, showing strike and dip	
inclined	80
vertical	<b>+</b>
Gneissic layering, showing strike and dip	
inclined	<u>**80</u>
vertical	<b>+</b>
Cleavage, showing strike and dip	·
inclined	65
C-S fabric; inclined	لمِلمِ
Crenulation cleavage, showing strike and dip	5 0
inclined	<u>80</u>
vertical	H—H
Shear-sense indicator, showing dip of metamorphic foliation	
dextral	
inclined	80
Lineation, unspecified, showing trend and plunge	
inclined	→ 80
Mineral lineation, showing trend and plunge	
inclined	<b>→</b> 70
Stretching lineation, showing trend and plunge	
inclined	<b>→→</b> 40
Axis of crenulation, showing trend and plunge	
inclined	→ 70
sotopic age determination site with identification number	(A) 195820
