Fault	
exposed	
concealed	
Fold, showing axial trace and generalized plunge direction	
syncline; exposed, concealed	
Small-scale fold axis, showing trend and plunge	T
unspecified	——> <sup>58</sup>
Z-vergence	$-N \rightarrow 60$
Bedding, showing strike and dip	
inclined	48
trend of bedding	
gneous layering, showing strike and dip	
inclined	
gneous flow banding, showing strike and dip	
inclined	85
vertical	<del></del>
Vay-up indicator	•
graded bedding	$\mapsto$
Metamorphic foliation, showing strike and dip	
inclined	70
vertical	<del>-</del>
Cleavage, showing strike and dip	•
inclined	80
vertical	_
Crenulation cleavage, showing strike and dip	
inclined	" 70 "
Shear-sense indicator, showing dip of foliation	
dextral	
inclined	60
vertical	- <del>4</del> -
sinistral	~*
inclined	- <b>▲</b> 65
Mineral lineation, showing trend and plunge inclined	
Axis of crenulation, showing trend and plunge	
inclined	40 ————————————————————————————————————
Cleavage-cleavage intersection lineation, showing trend and plunge	~
inclined	-0.46
Airphoto lineation	>
unspecified	
fracture pattern	
Stromatolite fossil locality.	
sotopic age determination site with identification number	√ 178203
