Geological boundary	
exposed	
concealed	
concealed, interpreted from aeromagnetic data	
Fault or shear	
exposed	
strike-slip, showing relative dextral horizontal displacement	. — 🚔 —
concealed	
concealed, interpreted from aeromagnetic data	??-
Fold, showing axial trace	
anticline, exposed, concealed	
syncline, exposed, concealed	V , V ,
Small-scale fold axis, showing trend and plunge	T T
unspecified	>53
Trend of bedding or foliation	
Bedding, showing strike and dip	
inclined	<u> 3</u> 7
overturned	
way-up not known, inclined	
Igneous layering, showing strike and dip	
inclined	16
Way-up indicator	
pillow structure	→
graded bedding	
Metamorphic foliation, showing strike and dip	
inclined	89
strike and dip estimated from aerial photography	•
vertical	
Cleavage, showing strike and dip	
inclined	_ <i>63</i> _
Lineation, unspecified, showing trend and plunge	
inclined	→ 80
Stretching lineation, showing trend and plunge	> 00
inclined	— 33
Bedding-cleavage intersection lineation, showng trend and plunge	33
	> 56
inclined	→> 50
inclined	
Fracture, joint, or extension vein, showing strike and dip	→ ▷ 7
	89
inclined	_=
Airphoto lineament	
unspecified	
fracture pattern in granitoid rock	
Aeromagnetic lineament	
Isotopic age determination site with identification number
