Geological boundary	
exposedconcealed	
Fault, showing dip of fault plane	
exposed	78
concealed	
concealed, position uncertain	-??-
slickenside, showing direction and plunge of striation	A 45
mylonite zone	m m
Strongly foliated rock	
Fold, showing trend and plunge direction	
anticline, exposed	\longrightarrow
syncline, exposed	
syncline, concealed	1.1
Small scale fold, showing strike and dip of axial surface, and plunge of fold axis	'
anticline, unassigned	65
D ₂ anticline	
D ₂ syncline	
Bedding, showing strike and dip	
inclined	20
overturned	60
trend	
Way-up indicators	
sedimentary structure	\rightarrow
upwards fining sequence	ightrightarrow
Metamorphic foliation, showing strike and dip	
inclined	24
Cleavage, showing strike and dip	
inclined	_ <i>7</i> 5
vertical	Н
Intersection lineation, showing trend and plunge direction	
plunging	→>50
Fracture or joint, showing strike and dip	
inclined	80
Stromatolite locality	W
Airphoto lineament	
foliation trend	
Aeromagnetic lineament	
Isotopic age determination site with GSWA identification number	⊘ 118963
