CAINOZOIC	QUATERNARY			<i>Clay, silt, sand, gypsum, halite: lacustrine</i>	
				<i>Gypsum and quartz sand, silt: aeolian</i>	
				<i>Red quartz sand: aeolian</i>	
				<i>Quartz sand, rock fragments, clay, silt: colluvium, minor alluvium</i>	
				<i>Pisolitic, nodular or massive limestone; ferruginous inclusions, minor chalcedony; calcrete and kankar</i>	
				<i>Red quartz sand, ferruginous pisoliths ; residual lateritic soil, in part deflated</i>	
				<i>Pisolitic laterite</i>	
				<i>Silcrete; intensely silicified sandstone, siltstone, claystone</i>	
		TERTIARY			
		MIDDLE MIOCENE	Plumridge Beds		<i>Sandstone, siltstone, claystone</i>
PALAEOZOIC	LOWER PERMIAN	Paterson Formation		<i>Sandstone, conglomeratic sandstone, siltstone, claystone, minor tillite</i>	
		Wanna Beds		<i>Fine, well sorted quartz sandstone, minor claystone</i>	
		Lennis Sandstone		<i>Cross-bedded reddish brown feldspathic sandstone with thin beds of micaceous siltstone</i>	
	LOWER CAMBRIAN	Table Hill Volcanics		<i>Tholeiitic basalt, amygdaloidal and vesicular; minor sandstone</i>
