

|  |  |
|--|--|
| Geological boundary  |  |
| exposed.....   |  |
| concealed.....   |  |
| concealed, interpreted from aeromagnetic data.....         |  |
| Fault  |  |
| exposed.....   |  |
| concealed.....   |  |
| concealed, position uncertain.....                         |  |
| concealed, interpreted from aeromagnetic data.....         |  |
| strike-slip, showing relative horizontal displacement..    |  |
| Strongly foliated rock.....                                |  |
| Fold, showing axial trace and generalized plunge direction |  |
| syncline; exposed.....                                     |  |
| Small-scale fold axis, showing trend and plunge            |  |
| minor anticline.....                                       |  |
| Z-vergence.....  |  |
| M-vergence.....  |  |
| Bedding, showing strike and dip                            |  |
| inclined.....  |  |
| vertical.....  |  |
| overturned.....  |  |
| trend of bedding.....                                      |  |
| Palaeocurrent, showing trend                               |  |
| from cross-bedding.....                                    |  |
| Way-up indicator   |  |
| pillow lava.....   |  |
| graded bedding.....  |  |
| Metamorphic foliation, showing strike and dip              |  |
| inclined.....  |  |
| vertical.....  |  |
| Fossil locality.....                                       |  |
| Trace fossil locality.....                                 |  |
| Plant fossil locality.....                                 |  |
| Stromatolite fossil locality.....                          |  |
| Isotopic age determination site with identification number |  |
